

Project Acknowledgment

The National Park Service and the Recreational Programs Division of ADECA require all properties protected by Section 6(f)(3) of the Land and Water Conservation Fund Act have permanent signage displayed at a prominent location within the park.

The location of acknowledgment signs at entrances to outdoor recreation sites and at other high visibility areas within the park is encouraged. Costs related to project acknowledgment are eligible as part of the initial capital investment, and may be submitted for reimbursement.

Permanent signs must be displayed on the following LWCF/RTP development projects, acquisition and developments where an expansion of an existing developed recreation area, and acquisition projects. Project sponsors are required to use the permanent sign specification that follows on the next two pages. You may order your sign from any of the companies listed below or any other sign fabrication company that is capable of meeting the specification. Please notify the funding unit of other vendors that are capable of producing the same signs so they can be added to the supplier list. The relative size of the print for the park name and city/county name can be changed to accommodate longer or shorter names. Discuss this matter with the sign fabricator.

	Inner Circle Background Letters	White Black

FABRICATION:

Fabrication of all parts shall be accomplished in a uniform and workmanlike manner. All panel fabrication, including cutting, punching, and drilling of holes, shall be completed prior to final surface preparation and application of primer or finish treatment. Metal panels shall be cut to size and shape and shall be free of buckles, warp, dents, burrs, and defects resulting from fabrication.

The panels shall be fabricated from standard widths of aluminum sheet. The blanks shall be cleaned, degreased, and chromated or otherwise properly prepared in accordance with DuPont's Two Step process noted above.

The signs should be mounted on 4 x 4 treated wooden posts or appropriately sized metal supports. Be sure to instruct the sign fabricator on the location of the sign mounting holes.
